R5636DW60-IP65 / R5636WW60-IP65 / R3528DWW120-IP65 / R3528DWW240-IP20

LEDstripSuperLight2013

The 5636 LED makes indirect lighting efficient !

The R5636 LED strip range, with daylight or warm whites render an intense light thanks to bigger LEDs. They have a range and intensity suitable for a bright lighting in any living room. It can be dimmed thanks to our dimmers (such as the C1M1208P for instance).

Ultra bright 2200-2400 lumens per meter 24V available

Model	Colors	Voltage	Current	Watt/M	LED per meter	Caractéristiques
R5636DW60-IP65	Daylight White	12V	1,2A	14.4W	60	5m spools Cutting every 3 led possible Ultra bright 45 lumen/leds
R5636WW60-IP65	Warm white					

Now as a 240 L/m strip, our Adjustable White LEDStrip lets you benefit from the mood you like best at any given time!

Our Adjustable White LED Strip increases its brightness 2 folds.

With these strips, you can adjust from warm white to daylight as well as dim at the chosen set. 240 LED per meter give an efficient light for a room with the confort to adjust the shade of white. These are the ideal LED strips for living or working quarters. As for public spaces where welcoming the patrons goes beyond mere functionality it strikes as a definitive plus. Our range stilll offers the 120LED/m brightness. We also use the same technology of 2-in-1 LED. This ensures a white tuning which is not visible.

Adjustable Warm White and Daylight LED Strips 24V available
