Adjustable-Tone Warm or Daylight White LED Window Display Blocks

To light your collections or most precious displays, consider this fine rotary LED block.

Adjust the tone between warm white or daylight white thanks to a remote. You can also control the brightness while keeping the tone. With its fine design, and displaying a very uniform light, it fits inside window displays to enhance its content.

This rotating block suits display windows of caterers, pastry shops, chocolate shops and also of watch stores, jewelry stores, perfumeries, antiques and private collections... The light source is thin, discrete and does not heat the articles on display.

Its two rotating supports can be glued on glass or plexiglass of the window display. The block has a deflector which guides the beam to prevent glaring.

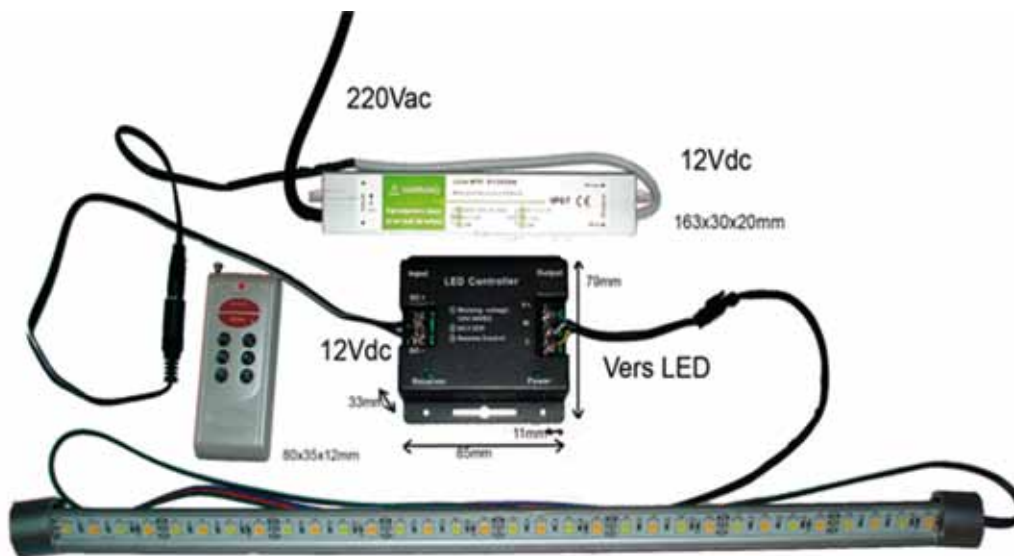

Technical Characteristics

- LED : 5050 caliber
Brightness : Warm white 2900- 3200K ; 15-18Lm/led
Daylight white 6500- 7000K ; 17-20LM/led
440Lux@50cm
- Density : 72 LED/m
- Beam angle : 100° - Block diameter : 20mm
- Power supply : 12V - Power 15W/m (1=1,25A/m)
- Fixing by glue

Products meet the following standards:    Subject to modification without prior notice
