

Mini Architectural LED Spotlight 4W

T2

Combine power and design to enhance your architectural projects

Product Description:

The Mini Architectural LED spotlight is a compact and powerful lighting solution, designed to enhance architectural details.

Despite its small size, it delivers high-intensity light with its 4 LEDs of 1W each, offering a warm and uniform illumination with a color temperature of 3000K (other white temperatures available). Equipped with a 15° lens angle and an IP65 protection rating, this spotlight withstands harsh weather, ensuring a long lifespan of 50,000 hours. Perfect for outdoor applications requiring precise beam direction, it operates on 24V DC input, maintaining optimal performance even in extreme conditions from -30°C to 50°C.

Applications:

- Highlighting architectural details
- Illuminating building facades
- Lighting for monuments and artworks
- Landscape or scenographic lighting projects

Model	T2
Dimensions	L65 x 65 x 95 (mm)
Power	4*1W
Voltage	DC24V
Lifespan	50,000 hours
Color Options	Aluminum (other colors available upon request)
Color Temperature	2700K > 6000K
Protection Rating (IP)	IP65 (water and dust resistant)
Lens Angle Options	15° to 45° (available on request)
